Awesome, thanks!! I need to look through my list. There may be a couple on flash drives that I have in hand, so I will have to look at that.

Hey, these have been uploaded to SEMS via RTI. Are there any more left to upload?

Hey,

So some of these I have already processed and sent to SEMS. Maybe you can focus on 5.14.19, 7.17.19, 12.23.19 and 1.17.20. Those are all fairly small I think to combine.

Okay, maybe I can start combining files and see how far I get? Let me know if you want to just take lead on this, I'm cool with that too. Just let me know how I can help.

Let me look at what he put in there before anything gets deleted. I have been keeping track of what's left to finish. I just need a few hours to wrap it up, based on my list. I had 5 meetings today so I am hoping for slower times, we'll see.

Yeah, there are some gnarly files in there for sure. I have been combining PDFs for the most part. If it's just too much to deal with, I can take him a flash drive. I need to go in the office at some point anyway to give him some other things.

I've downloaded everything. Can I let Darren know he can remove the files from the FTP?

There are so many docs here I don't even know where to start with getting everything into SEMS...how do you usually do this – give everything to Rodney? Or combine PDFs and do everything through RTI? Some of these folders/subfolders have hundreds of files within, including excel workbooks with multiple spreadsheets, which would make it annoying to convert everything to PDF.

Hi Casey and Shawn,

I hope all is well!

Thanks for your patience while I uploaded these deliverables (below) into the FTP. With Julian out of school the last few weeks, it's been fairly hectic (to say the least).

I loaded everything except the 10/2/18 deliverable, which consisted of database load files from the CDPHE.

Concerning the 10/5/16 deliverable, Toeroek received Hennis' Ability to Pay records from Mike Rudy on September 27, 2016, but the original (paper) files were dated September 19, 2016. The documents were scanned and sent back to EPA on 10/5/16. For all confidential business information ("cbi") records, we affixed a security password to the pdf, which have the word "cbi" at the end of the filename. The password to open these files are **cbi**.

Everything else should be good to go.

Casey, as our contract winds down, let us know if you need anything. This was the last outstanding task Shawn had assigned. As you know, our contract ends on November 30, but Bonita Peak extends until February 28, 2022. If our contract renews (or there is no decision after 11/30), we will have plenty of availability in December.

I'm only out a couple days in November, so reach out anytime.

Thanks!

Darren

Hey Darren,

As we discussed, I have been going through your deliverable index and I have a few that I cannot seem to find either in email or in SEMS. Looks like some of them are on a drive which I have all of them, so I will need to take another look to see if I missed anything. Wanted to get your thoughts. Thanks!

10/5/2016	Processed electronic files of Ability to Pay financial information for a PRP and associated companies, which was received in paper copies from EPA on September 27, 2016.	Litigation Support	Encrypted Hard Drive
